**CHARLESTON or LARGE WAKEFIELD**

**COPENHAGEN MARKET**

### **GOLDEN ACRE**

62 to 64 days. The earliest round-headed Cabbage; especially valuable for early market and shipping. Plants very small and compact; stem short; heads uniformly round, firm, commonly 6 inches in diameter and weighing 3 pounds. This is similar to Copenhagen Market but is several days earlier and the heads are smaller. It is practically as early as Early Jersey Wakefield.

### **FERRY'S ROUND DUTCH**

71 days. Splendid for home and market garden. Plants small and compact; stem short. Heads almost ball-shaped, commonly 7 to 8 inches in diameter and 6 inches deep, weighing 4½ to 5 pounds. Firm and of high quality. Slow to produce "seeders."

### **CHARLESTON or LARGE WAKEFIELD**

71 days. Desirable for home and market garden. Head broad heart-shaped, 8 inches broad at base, firm, commonly weighing 4 to 5 pounds. Fully a week later; heads larger and broader heart-shaped than Early Jersey Wakefield.

### **COPENHAGEN MARKET**

A fine Cabbage. This variety is nearly as early as Jersey Wakefield. The stem is short, and the large, round, solid head has few outer leaves. My stock of this popular variety is extra early, uniform and dependable. A round head, weighing 3 to 3½ pounds, produces headed Cabbage 70 days after plants are set out.

**FERRY'S ROUND DUTCH**

## GENUINE WILT-RESISTANT FROST-PROOF PLANTS

Ready September 1 to June 15  
except where otherwise noted

### WISCONSIN ALL-SEASON

This is a yellows-resistant strain developed at the Wisconsin Experiment Station by selection of healthy plants of standard All-Season grown on infested land. Wisconsin All-Season is a very valuable, heavily productive, hard-headed variety of particular merit for use in yellows-infested localities, and it is well adapted for kraut and for winter use. Makes heads in 85 days, weighing 6 to 8 pounds.

### MARION MARKET

This is also offered as Wisconsin Copenhagen and is a very important midseason yellows-resistant variety for kraut manufacture and market. This variety has prominent globular heads which approach those of Glory of Enkhuizen in size, and it produces a heavy yield on yellows-infested soil where ordinary varieties fail. Matures heads 70 days after plants are set out. Somewhat larger head than Copenhagen, but the same shape.

### GLORY OF ENKHUIZEN

80 days. Attractive, round, solid heads, 7 to 8 in. in diameter, and weighing from 5 to 6 lbs. each. They are exceptionally firm and solid. Leaves are finely ribbed, exceedingly tender and of remarkably fine flavor. Makes excellent kraut, slaw, etc.

### GEORGIA BLUE STEM COLLARD PLANTS

These are very much like Cabbage plants. They grow from 2 to 3 feet tall, with light green, tender leaves on long stems. They withstand heat and have an excellent flavor when cooked. I have a good supply on hand the year round and can make prompt shipments at the same price as Cabbage.

# FULWOOD'S GENUINE FROST-PROOF ONION PLANTS

*Ready September 1 to June 1*

Southern-grown Onion plants are no longer an experiment. Large quantities are set out every year and they are rapidly displacing sets. They will grow large, sweet Onions early, and are good keepers. They produce Onions two to three times larger than sets, and seldom run to seed. They can be set early, the same time you would put out sets or cabbage plants. Therefore, we strongly advise you to use our plants instead of sets, whether for the market or home use. Our Onion plants are grown from the very best seed, and will be found true to name. These Onion plants should be set out at the same time as cabbage plants, and you can order them for shipment at the same time.

Most Onion plant growers pull Onion plants ahead and store them several weeks before shipping. Such plants cannot produce good crops. Our plants are fresh pulled and shipped the same day and produce better crops.

## SWEET SPANISH

The best of the very large mild varieties. One of the original Spanish types, but a better keeper because it was selected for keeping qualities. Deep amber-orange; small neck; globular.

## YELLOW BERMUDA

This is the most widely planted of all Bermuda Onions. No sweeter Onion is grown than this, and it always has a ready market. It is a large producer and a real money-maker. Whether grown for marketing or for your own table, you can make no mistake in ordering this variety.

## CRYSTAL WAX BERMUDA

Probably the best-selling Bermuda Onion on the market, because of its exceptionally attractive appearance. It looks much like the Yellow Bermuda except that it is crystal white and waxy. Because of its sweet, mild flavor, like the Yellow Bermuda, this is an excellent eating Onion.

### PRICES

Onion Plants are tied 100 to a bunch. Shipping weight is 7 lbs. to the 1000 plants.

My Tomato plants, grown on new land from Certified seed, are certified by the State of Georgia. I grow each season four hundred acres of Tomato plants. They are grown in the open field and when shipped are 8 to 10 inches tall; they are field hardened, stocky, and well rooted. Each bundle of 100 is wrapped with paper to hold the damp moss to the roots. They are then packed in special crates or hampers and shipped by express, and will keep in good condition six to ten days. These plants are not frost-proof and should not be planted until danger of frost is over.

The fact that the seed is planted here in February and March gives the plants a chance to become acclimated and toughened by outside temperatures. When set farther North they will start growing quickly and produce rich, red, ripe Tomatoes three weeks before home-grown or hothouse plants. I ship these plants to every part of the United States, and have been shipping large quantities to market gardeners and truckers for thirty-six years. Van Camp Packing Co., of Indianapolis, Ind., uses ten million of my Tomato plants every season. Send me your order for some of these fine plants. You will be more than pleased with the early profitable crop they will produce.

## GREATER BALTIMORE

is similar to Stone, heavily productive and very valuable for canning. The large, scarlet-red fruits commonly weigh 6 ounces; they are deep but flat, smooth, very firm and solid.

## MARGLOBE

is a splendid type for earliness and uniformity. It is particularly valuable for shipping; definite disease-resistance recommends it for use in sections infested with fusarium wilt and nail-head rust. Plants thrifty and heavily productive, bearing over a long period. Fruits uniform deep scarlet, large, globe shaped; smooth, solid and of distinct quality.

## RUTGERS

is highly recommended as a second-early variety for canning and Tomato juice. Fruits are of medium to large size, similar in shape to Marglobe, but slightly more flattened.

## PRITCHARD (SCARLET TOPPER)

is a very promising, heavily productive wilt-resistant variety for home and market garden, shipping and canning. Fruit large, globe shaped, scarlet and well colored about the stem end; flesh firm and of fine quality.

Showing P. D. Fulwood, Jr. He uses this plane going to different farms where he can be in touch with all the work going on at all times.

CALIFORNIA WONDER (Sweet) PEPPER

PORTO RICO SWEET POTATO

## Fulwood's IMPROVED PORTO RICO SWEET POTATO PLANTS

Southerners who know their yams will appreciate this Porto Rico as the finest ever. People in the East and Middle West who think of Sweet Potatoes as being small, dry and yellow have a real treat in store for them if they will try this luscious variety. My Porto Rico always has deep rich red meat that is especially sweet and tasty. It is two to three weeks earlier than most yams and is an enormous yielder, keeping especially well. Northern markets and curing houses pay top prices for this variety.

*Not Frost-Proof. Ready April 1 to July 1*

## Fulwood's EGGPLANT PLANTS

**Black Beauty.** I specialize in this one variety because it has many merits. It holds its color well, grows very large, has good shape and is of unusually good quality. The Black Beauty variety is naturally early, and if you will grow it from my fine plants your crop will be just that much earlier.

*Not Frost-Proof. Ready April 1 to June 15*

**PLANTING NOTES:** When plants arrive, if your ground is not in condition to plant right away, take the plants out of the crate, cut the bands, spread out and place the roots in soft mud. In planting, pack soil well around the roots, pouring water in the hole after the plants are set out. Throw loose dirt around the plants after watering to keep the wet soil from drying out. Use chart above for proper spacing.

## A FEW COMMENTS TAKEN FROM HUNDREDS OF LETTERS WE RECEIVE FROM CUSTOMERS EACH YEAR

### APPRECIATES QUALITY OF PLANTS AND SERVICE

This letter is to express my appreciation of the service and the quality of the Tomato, Cabbage, and Pepper plants I have just received from you. I have done business with any number of Southern plant growers in the past seventeen years with indifferent success and appreciate finding a grower who ships plants of high quality when you want them."

W. O. Staples, Saugus, Mass.

### WELL PLEASED WITH EVERYTHING

"The Bermuda Onion plants just received—fine condition, and fine plants. Thanks for the Cabbage plants. Well pleased with everything."

H. B. Conyers, Urbana, Ohio.

### TOMATO CROP GREAT SUCCESS

"My Tomato crop was such a success last year, so am increasing my order this year. I think your plants are wonderful. I sold bushels and bushels, and many of my customers asked me where I got my plants. Thank you."

Mrs. Rex E. White, Scranton, Ohio.

### PLANTS ARRIVED IN FINE SHAPE

"Your plants got here today in fine shape. We are well pleased with them. We have been using Fulwood plants for three years and they seem to do much better than the plants we get here."

Clifford Scott, Auburn, Nebraska.

### PLEASED WITH ONION AND CABBAGE PLANTS

"Thank you for the fine Onion and Cabbage plants. Arrived just in time to begin growing. Yours with best wishes for time and eternity."

W. I. Greathouse, Mount Carmel, Ill.

### WON PRIZES FROM FULWOOD PLANTS

"The plants I received from you in 1945 won First and Second prizes in the Western Cartridge Company Victory Gardens."

R. M. Smith, East Alton, Ill.

FARMER FULWOOD & SEEDLINGS  
*Better than cotton or cold frames.*

## AGRICULTURE

### King Tomato

Every night last week, special freight trains pulled out of Tifton, Ga., and sped north over the Southern and Atlantic Coast Line roads. The 10-to-70-car trains, as well as dozens of chartered airliners, all carried the same load: tomato seed plants. Before the short shipping season ends, South Georgia farmers will ship a billion tender young tomato plants for planting in northern fields, along with hundreds of millions of onion, cabbage, broccoli, sweet potato, pepper and lettuce seedlings.

For this business, now worth some \$10,000,000 a year, south Georgia farmers can thank Paul Dearing Fulwood Sr., 56. When he was 16, Tifton-born Paul Fulwood ran away from home rather than become a machinist, as his father wanted. He went to Florida and worked on a tomato farm, where he got the idea for the seedling business. At 17, he returned to Tifton, started to raise plants. First year's yield: 35 lbs. of cabbage seed, some 350 bu. of potatoes.

Fulwood soon tapped a bigger market. Canning companies, like Campbell Soup, Stokely-Van Camp, were then raising their own plants under glass in cold frames. They found that Fulwood's field-grown seedlings were hardier, could be harvested earlier and cost less (\$2.50 to \$3 per thousand v. \$8 to \$10 for cold frame plants). A tremendous market for seedlings developed (Campbell's alone buys 80,000,000 tomato plants a year) and seedling growing sprouted into the biggest industry in Tift County. Where cotton had once been king, the new ruler was the tomato. Paul Fulwood's business grew, with the help of General Manager Paul Jr., who studied plant pathology at the University of Georgia. This year the Fulwoods planted some 1,800 acres.

The biggest part of their business is tomato plants, which bring in the most money, but involve the most risk. A cold wave during the six-week period, when tomato plants must be shipped, can ruin an entire crop. Three successive bad seasons in the early '20s almost bankrupted Fulwood. But one good season gave him enough profit to take his whole family to Europe for the summer. This year the Fulwoods are assured of their biggest season ever, expect to make their crop. For the uncertainty of his high-risk business, Fulwood has a nerve sedative. Said he, "I just go fishing."

TIME, MAY 20, 1946

## Guarantee

### 38 YEARS OF SATISFACTORY SERVICE

I guarantee all of my plants to be exactly as described in this catalog. Fresh pulled day order is received (where weather will permit). Plants pulled approximately 50 to bundle and packed to carry to your home in good condition. Any plants arriving in bad condition will be reshipped at once, provided you notify me within five days. When you purchase Fulwood's plants you will receive full count, no runts, no diseased plants, and you will receive the exact varieties ordered.

I send you only the highest quality plants and gladly stand back of them. However, weather, soil, and care also influence crops, so in no case shall I be responsible for any amount beyond the purchase price.

*P. D. Fulwood*
